

INFINITY5-3

3.2 Megapixel Global Shutter CMOS Microscope Camera

High performance microscope camera for a wide range of applications – with dual output to HDMI and USB 3

INFINITY5-3

Teledyne Lumenera's INFINITY5-3 is a high quality 3 megapixel microscopy camera that provides high speeds at high resolution. The INFINITY5-3 is based on the Sony® PregiusTM global shutter CMOS sensor that rivals sCMOS technology. With fast focusing at high frame rates of up to 120 frames per second, the INFINITY5-3 performs in a wide range of applications.

The INFINITY5-3's 1/1.8 inch sensor format accommodates a 2064 x 1544 resolution with 3.45 micron pixels. The HDMI output allows the INFINITY5-3 to connect to both a computer and HDMI TV or monitor for applications where knowledge sharing is critical.

Simultaneous Live Viewing on Computer and HDMI Monitor

Operate the camera by directly connecting to an HDMI monitor, or connect the camera to a PC or Mac via USB 3 for image preview and capture. Use the soft-touch response buttons to control the camera with or without connection to a computer.

Ready to Perform

The INFINITY5-3 comes ready to perform with cables (USB and HDMI), power supply, and INFINITY CAPTURE software for routine imaging needs, including camera setting adjustments, live preview, image capture, and video clips. The INFINITY5-3 also provides third-party interoperability with MetaMorph and Micro-Manager microscopy software, MatLab systems engineering software, LabView analysis software, and TWAIN and DirectShow interfaces.

Accurate Color

Teledyne Lumenera's specialized algorithms ensure accurate color reproduction that results in a sample preview on a monitor that matches the view in the microscope eyepiece.

Guaranteed Quality

Teledyne Lumenera provides a full three-year year warranty on all microscopy cameras.
