The MegaVID Wi-Fi 12MP camera is an incredible addition to our camera line. Operating at 5GHz frequency for maximum speed (4000 x 3000 @ 30fps) the MegaVID can be mounted to nearly any microscope that supports trinocular C-mount and connects to any iOS or Android device through the LW Scientific app. Utilize the MegaVID Wi-Fi to its fullest capabilities using the included software disc to connect to any desktop, any PC via USB, and any 4K TV or Projector via HDMI. The MegaVID Wi-Fi has many applications but is best suited for teaching, training, and educating clients and students.
