

HD1500T User Guide

Chapter 1 Introduction

Advanced Design

Meiji Techno America released the new generation scientific color cameras--HD1500T. With the amazing color fidelity, HD1500T provides a perfect solution for the high definition scientific photography. To meet the customer individual requirements, the flexible parameter settings allow you to quickly get wonderful live images easily and freeze the screen simply to observe the details.

HD1500T inherits all the advantages of the first generation HD1000T cameras and significantly improve both the hardware and software, bring more fluent visual experience and intuitive user interface.

To get more information about HD1500T, please read this document completely.

Chapter 2 System Standard Items

One HD1500T camera,

One 12V2A power adapter,

One HDMI cable (2-meters length),

One SD card (8G capacity, class 10),

One mouse (with 1.5-meters cable),

One USB2.0 cable (gold plated connector).

1. USB interface :

A: Connect a mouse to the USB port. Use the mouse to control the camera directly.

B: Connect the USB port to PC to make the camera work as a **Driver-Free** camera. Use ISCapture software to control it (similar as using the other Tucsen cameras).

Note: No driver installation is needed when connecting HD1500T to PC via USB port.

2. HDMI interface :

Use the HDMI cable to connect HD1500T to the monitor. Image data is transferred and displayed on the monitor according to the HDMI protocol.

3. Power interface :

Please use the provided **12V2A** power supply. When power is plugged in, the red light is on. When switch on the camera, blue light is on.

4.ON/OFF key :

Press and hold ON/OFF key until the blue light is on or off to turn on or off the HD1500T.

5.SD card :

To get faster and more stable data transfer, recommend to use **Class10** SD card.

6.C mount :

Standard C-mount optical port.

7. Anti-dust seal:

Please remove the seal when first time use the camera.

The seal was placed on the camera optical port when it left the factory. It is used to avoid the dust accumulating during the transport.

Chapter 3 HDMI Operation

Step 1. Connect the camera.

1. Plug in the 12V2A power supply. Use HDMI cable to connect the camera to the monitor. Press and hold ON/OFF key until blue light is on.
2. Connect the mouse to the USB port. Move the cursor to get the settings on the screen.
3. Insert the SD card. Capture images or videos to the SD card.

Step 2. Move the cursor to the left of the screen.

When move the cursor to the left of the screen, 'Capture' and 'Setting' icons will appear (See image on the left hand side). Click 'Setting' to get parameter setting menu (See image on the right).

Step 3. Move the cursor to the right of the screen.

Step 4. Check the photo album and videos

1. Check the album and delete the pictures.

2. Check the video and delete the video. To delete the video successfully, be

sure this video is not in use.

Step 5. Compare preview with the captured images.

Chapter 4 Connect HD1500T to PC

- (1) Use USB cable to connect the HD1500T to the PC.
- (2) Plug in the 12V2A power supply. Press and hold the ON/OFF key until blue light is on to turn on the camera.
- (3) No driver installation is needed when connected to PC. Install ISCapture to adjust parameters and acquire images.

(4) Fig.4-1. The left side of ISCapture

- (1) Start the ISC. The parameter settings are shown on the left side of the software. See Fig.4-1.

Note: When use 'Lock WB' , it takes 3 seconds to make sure the camera finish the initialization.

- (2) Switch the **Frame Speed** Normal High in 'Exposure Control' tab to get different frame rate. In Normal mode, the image quality is better than High mode. To get faster frame rate, please select High mode.
- (3) Functions 'Fluorescence', 'Temperature Control' and 'Fluorescence Color' are not available for HD1500T. These functions are gray out when HD1500T camera is attached.

Cleanliness

When the camera is NOT in use, please screw in the dustproof cap to avoid the dust from the environment accumulating on the optical port.

When get dust accumulated on surface of the optical port, recommend to use a blower bulb to blow away the dust first. If it is still there, please use a very soft lint free cloth (Micro Fiber cloth) with absolute ethyl alcohol or similar cleaning agent to gently clean the surface.

If find the dust inside the camera, please DO NOT open the camera case by yourself. Please contact Meiji Techno America support team to get further advice.

Maintain

Only Meiji Techno America reserve the right to open the camera case for maintenance. If need repair, please contact the customer support team.

CAUTION : Please DO NOT open the camera case and assemble it back by yourself. If assemble the camera by yourself, it will easily bring dust and moisture inside the cameras. Any sensor scratch or moisture issue brought by opening the camera case by yourself is not covered by the warranty.
